

## DILLON RECEIVES "GREEN 30" AWARD

28 April 2011

The Green 30 award recognizes those organizations whose employees are highly positive about their record on environmental stewardship. Employees in organizations that participated in the 2011 *Best Employers in Canada* study were surveyed on their firms' environmental initiatives. The 30 firms with the most positive responses to the environmental questions have received a Green 30 award.

We have received the Green 30 award for our passion and commitment to reducing the impact of our business on the environment.

This is an important and exciting accomplishment. According to the results, 84% of employees strongly agree that Dillon has strategies and activities that are environmentally responsible, and 78% strongly agree we effectively communicate these actions. The results demonstrate on average an 8 to 13% higher level of support from Dillon's employees on our environmental initiatives than those from the 2011 Best Employers responses. These results reflect the passion and dedication that many individuals across the company bring to our corporate environmental management initiative, our community and environment committees, and our local environmental improvements. Thank you for your ongoing efforts.
