

Sustainable Energy

DILLON
CONSULTING

Dillon is committed to being a leader in sustainability. We assist our clients in achieving their net zero targets by making ideas become a reality while striking a balance between visual appeal, practical function, cutting edge technology, and budgetary resources.

Platinum member

Our team can provide well-rounded solutions throughout the lifecycle of a sustainable energy project, starting at the early stages of feasibility studies and assessments, into engineering and design, and all the way through to implementation. Our electrical, mechanical, structural, and civil engineering professionals provide creative solutions to unique problems while working to improve the planning, design, construction, and rehabilitation of facilities while achieving net zero goals.
